

## BLUTEST EM3

WIRELESS EMERGENCY LIGHTING AUTOMATED TEST SYSTEM.  
COMBINING DALI BASED EMERGENCY LIGHTING FROM TRIDONIC  
AND BLUETOOTH TECHNOLOGY FROM CASAMBI.  
PERFECT RETRO FIT SOLUTION WITH NO NEED FOR ADDITIONAL  
CIRCUIT WIRING.

## BLUTEST EM3

### Wireless Lighting and emergency lighting from Tridonic and Casambi

Following successful field trials, the new control and monitoring system is available from May 2021.

Utilising components and software from industry leaders Tridonic and Casambi we can specify, install, and commission complete lighting control and emergency lighting monitoring and reporting systems.

- Total solution for new or retro-fit lighting installations
- Reliable proven Bluetooth 'mesh' network
- Range of wireless drivers to control any type of mains led luminaire.
- Full scope of dimming control, scene setting and switching.
- Energy data at granular level can be accessed from each driver for energy analysis and benchmarking for preventative maintenance purposes (Dali - 2 drivers)
- Data collated by presence and absence sensors can control HVAC operation for efficient energy control routines.
- Fully automated emergency lighting testing configured to suit the function of the building. Test reports automatically presented to the 'cloud' for sharing and F.M. response.
